

BAY AREA
AIR QUALITY
MANAGEMENT
DISTRICT

PUBLIC NOTICE

March 22, 2019

TO: Parents or guardians of children enrolled at the following school(s):

**Bayside Academy
LEAD Elementary School**

All residential and business neighbors located within 1,000 feet of the proposed new or modified source(s) of air pollution listed below.

FROM: Bay Area Air Quality Management District

RE: Permit Application #28886 for the following sources of air pollution:

**Anaerobic Digesters and
BioCNG Gas Conditioning System**

Permit Application #28996 for the following sources of air pollution:

**Stationary Emergency Diesel Engines and
Publicly Owned Treatment Work Upgrades**

Proposal to operate at the following location:

**San Mateo Water Quality Control Plant
2050 Detroit Drive
San Mateo, CA 94404**

The Bay Area Air Quality Management District (the "District") is a local agency that regulates stationary sources of air pollution such as factories, industrial sites, and gasoline stations.

Whenever we receive a permit application for a new or modified source(s) of toxic air contaminants located within 1,000 feet of a school site, State law requires that we notify the public. To comply with this requirement, we distribute or mail a Public Notice to the parents or guardians of students enrolled at schools located within ¼ mile, and all residents and businesses located within 1,000 feet, of the proposed source(s).

You are receiving this Public Notice because a permit application has been filed with the District for the above referenced source(s) of air pollution. A description of the proposed project follows:

San Mateo Water Quality Control Plant has applied for an Authority to Construct and/or Permit to Operate to modify the operation of an anaerobic digester and a BioCNG gas conditioning system, install new emergency engine-generator sets and wastewater treatment plant processes, and alter existing wastewater treatment plant components.

PRELIMINARY EVALUATION

The District has evaluated the permit application for the proposed project and has made a preliminary determination that the project is expected to comply with all applicable District, state, and federal air quality-related regulations, including the health risks resulting from toxic air contaminant emissions. The preliminary recommendation is to issue a permit for this project. After considering all comments received, the District will make a final determination.

ADDITIONAL INFORMATION

If you are interested in getting more information, you may request copies of the District's evaluation report by calling the District at the telephone number listed at the end of this notice. This information is also accessible on the District website at:
